### DETAILED ACTION

This office action is in response to the remark filed January 20, 2004.

1. Claims 1-26 are rejected under 35 U.S. C. 103 (a) as being unpatentable over EP 457589 for the reasons of record.

Applicant argues that the present invention does not claim low-sulfur or low-nitrogen formulations, but rather, a composition and method that are essentially free of certain heteroatomic compounds. Applicant argues that there are certain heteroatomic compounds that are not excluded and have no deleterious effect on the diesel fuel.

The examiner begs to differ. Claim 19 and its dependents are directed to a low-sulfur diesel fuel. Applicant recited that the total amount of nitrogen and sulfur from the heteroatomic compound is no more than 5 ppm. EP clearly meets this limitation. While EP does not specifically teach the absence of these heteroatomic compounds, by virtue of the sulfur and nitrogen content of the fuel, EP clearly does not contain more than 5 ppm of these compounds.

Applicant argues that by specifically delineating a spectrum of compounds that is neither predictable, nor inherently practiced in the prior art that the diesel fuel's resilience and performance are improved.

The examiner agrees that the prior art fails to delineate the claimed compounds; however, with the removal of essentially all of the sulfur and nitrogen from the fuel, these compounds are also removed from the fuel, absent evidence to the contrary. Given that EP teaches a diesel fuel of low-sulfur and nitrogen content, EP also teaches the method of the present invention. The fuels of EP contain less than 1 ppm sulfur

and 5 ppm nitrogen. Therefore, it would be reasonable to expect that a reduction in sedimentation and discoloration would occur. The discovery of a previously unappreciated property of a prior art composition does not render the old composition patentably new to the discoverer.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
